

## Installation Trough

Foundation tray for competition boards with IAAF-certification, Foundation trays for the various competition boards with the dimensions 122 x 34 x 10 cm. The foundation tray profile is cut approx. 13 mm lower on both of the long sides. This means that when the tray is installed, the synthetic material can be fitted flush with the boards. This prevents the athletes from treading on metal with their spikes and possibly getting caught there.

The foundation trays are fitted at the factory with distance boards. This ensures that the foundation tray keeps its shape until installed in the competition or school sports board. In addition, by using the distance board, the plastic covering can be drawn further into the tray. **IAAF certified**

**40040:** Dimension 122 x 34 x 10 cm (IAAF certified)

**40030:** Dimension 122 x 34 x 10 cm (Height adjustable)

**40050:** Dimension 122 x 30 x 10 cm

**40070:** Dimension 122 x 20 x 10 cm
