

Hockey Goal Post (Dismantle)

Hockey goals (3.66 x 2.14 m), 'Competition'. Dismantle version for export. Complies with latest FIH regulations and requirements for international competitions.

Hockey goals, 'Competition' model, made of aluminium, white powder coated and with freely hanging net suspension. With this construction the net hangs freely in the goal frame so that the ball cannot bounce back out from the net support tubes. For quality and ease of handling this hockey goal is unrivalled and the following features set it apart:

1. The net hangs freely in the goal frame so that the ball cannot bounce back out from the net support tubes.
2. Goal frame profile (75 x 50 x 5 mm) which significantly reduces denting due to ball impacts
3. 30 mm thick side and backboards made of wood-reinforced aluminium profiles, coated with EPDM to reduce ball rebounds.
4. Double transport rollers for easy moving.

90080: Dimension 3.66 x 2.14 m

90120: Dimension 3.00 x 2.00 m (for indoor hockey)
