Multi Soccer Court

The boards for our AFN SOCCER COURT are made of aluminum side profiles (double-walled, wall thickness 2.3 mm) bordered in a U-profile with a radius of 2 mm and completely welded. The boards are 1 meter high. Rubber mats are placed under each fastening position to reduce the noise levels. For the freestanding version, counterweights (each weight approx. 20 kg) are placed on the base frames of the posts. Sockets or weights are included. The net is hung up via Nylon rings which are fitted onto the outsides of the boards through which a rope can be threaded. The entrance door (in the standard version: width 1 m, height 3 m) is a part of one board and is opened outwards. Fully welded doors, 3 x 2 m, made from high-grade aluminum.

Our AFN integrated net hooks are used for the net suspension. In the standard version, the nets are made of polypropylene (PP), 4 mm thick, with a mesh size of 100 x 100 mm. The net is fixed on via rings welded on to the boards and on the upper parts of the upright posts. The net encloses the court completely up to a total height of 3 meters.
